

MACROBLADE 84 ABT/W

Code: 07734500986

Color: EMERALD GREEN/CHERRY

Size: 22,0 - 27,5 MP (cm)

Description

Macroblade 84 ABT W provides control and stability for skaters needing little extra confidence and support when stopping. ABT is cuff activated and allows the skater to slide their braking foot forward to keep all eight wheels on the ground adding stability and enhancing balance during the braking process. This results in a smooth, gradual braking motion which instills more confidence. ABT can be switched to the left skate and is also height adjustable so as the brake pad wears down, it can be lowered to enable the foot to slide forward the same distance every time for consistent stopping power and technique. Using the brake will be easy and comfortable because the Macroblade boot will blanket the feet in comfort and the wheel/bearing set is ideal for skaters to have the right amount of speed and control without going too fast.

FEATURES:- IMPROVE YOUR FITNESS T

Womens Macroblade 84 ABT is great for casual inline skating and training. Great overall support and comfort with brake technology to help instill more confidence.

- FLEX AND LATERAL SUPPORT The Macroblade structure has an ideal mix of flex and lateral support & features ABT braking technology to help skaters brake more gradually with added confidence & stability.

COMFORTABLE PERFORMANCE LINER is the most comfortable in an inline skate. The padding in the tongue & ankle areas consistently cushions the feet. Buckle, power strap & lace closure secure the foot.

- TWINBLADE ALUMINUM FRAME is durable and helps keep skaters closer to the ground with its low profile design for enhanced balance and stability.

- ROLLERBLADE PERFORMANCE WHEELS 84mm/84A wheels blend speed & control perfectly for a moderate skate pace. An ideal size for those wanting ABT. SG7 bearing spin helps to provide the appropriate speed.

Category: SKATES / FITNESS

Gender: Women
